

WRECKING PERMITS

NOTICE: Wrecking permits will be issued only after the owner or contractor provides a letter from the following utilities verifying that the service installation has been disconnected. This applies to all structures that have one or more utility connections.

Also, please remember to bring a Certificate of Insurance, indicating the appropriate endorsement, when you apply for a wrecking or demolition permit. A copy of the Certificate of Insurance is required for each demolition permit. (This does not apply when the homeowner is performing the demolition)
